PRODUCT BROCHURE

VEDA BOOSTER

2 ml per 1 Ltr. water

It is a research biotechnologically developed nutritionally balanced food for plants. It can be easily assimilated in plant parts. It is composed from microbially derived protein hydrolysate having ENZYMES, Vitamins, organic substances precursors which are highly responsible for enhancing plant growth.

- Contents -

**Amino Acid, Fulvic Sew,
Sewed, Carbon, Silicon, Phyto Hormones**

Veda Booster
Organic Manure

Flowering & Fruit Development

VEDA SUPER NANO

Veda Super Nano Benefits :

- 1) The land was 100% in Chafft
- 2) Holds water in the soil
- 3) Increases soil organic matter
- 4) Increases the nutrients in the soil
- 5) White roots of crops grow in the ground
- 6) The process of uptake of 100% fertilizers in the soil increases.

Method of Use :

Dispense 50 gm. in 400 liters of water through a drip.

Veda Super Nano

VEDA P-25

Description : Veda P-25 is a vegetable origin fertilizer beneficial for all crops. It is made up of vegetable matters such as compost and crop residues. Veda P-25 is used to increase microbial activity in soil, improve soil structure, and enhance the root development of plants. Although it doesn't necessarily add nutrients directly, it may help plants take up the fertilizers you apply. The application of vegetable or origin organic fertilizer to crops, allows for energy savings and improved plant development during the critical stages of plant's life cycle.

Benefits : 1) Regular use of Veda P-25, the plants become healthy. 2) Veda P-25 is known to increase plants disease resistance capacity thereby reduces the use of pesticides used for controlling various chewing pests. 3) Improve root growth. 4) Enhances crop

Compatibility : It is compatible with must come commonly used for pesticides and synthetic fertilizers.

Botanical Formulation for Pesticide Desases

* Azadiration 0.15% EC

Does and method of Application : Veda P-25 must be deleted @250 ml 200ltrs of water ie. 1 to 1.5 ml/litr of water apply as fine mist until foliage is wet for best results. Apply when the plant is cool-do not apply immediately before or after rainfall for sprinkler irrigation or when the plant is under stress. A biodegradable surfactant may be used to optimize dispersal and leaf adherence Repeat application every 7 to 14 days as needed or vegetables spray several days before blooming. "It can be used for various crops which include Vegetables, Soybean Tur, Mung, grapes and other small fruits, Tree fruits, tree nuts, cotton, tobacco, shrubs shade and ornamental treesturf, foliage and flowering plants growing outdoors in greenhouses and interiors. Attachments area.

VEDA STICKER PRO

USES & BENEFITS :

- Spreader is an effective silicone based non-ionic spray adjuvant.
- Spreader can be used effectively in all seasons & for all types of crops.
- Spreader is useful for faster & enhanced spreading while spraying of agrochemicals.
- Because of addition of Spreader in the spray solution, the spray solutions get fastly penetrated in the plants making spray solution rain fast due to this maximum benefit of spray solution observed.
- Spreader can be used effectively with all type of agrochemicals like water soluble fertilizers micronutrients.

DOSAGE :

For Application : 0.25 mk to 0.50 ml per 1 Ltr. water
Soil Application : 250 ml / Acer

For Agricultural Use Only

Shake Well Before Use

VEDA F-25

Description : Veda F-25 is a vegetable origin fertilizer beneficial for all crops. It is made up of vegetable matters such as compost and crop residues. Veda F-25 is used to increase microbial activity in soil, improve soil structure, and enhance the root development of plants. Although it doesn't necessarily add nutrients directly, it may help plants take up the fertilizers you apply. The application of vegetable or origin organic fertilizer to crops, allows for energy savings and improved plant development during the critical stages of plant's life cycle.

Benefits : 1) Regular use of Veda F-25, the plants become healthy. 2) Veda F-25 is known to increase plants disease resistance capacity thereby reduces the use of pesticides used for controlling various chewing pests. 3) Improve root growth. 4) Enhances crop

Compatibility : It is compatible with must come commonly used for Fungal Attrack for Management & Synthetic Liquid Fertilizers.

Botanical Formulation for Fungicide Desases

Salt of Phosphorus - 40%, Copper - 10%

Does and method of Application : Veda F-25 must be deleted @250 ml 200ltrs of water ie. 1 to 1.5 ml/litr of water apply as fine mist until foliage is wet for best results. Apply when the plant is cool-do not apply immediately before or after rainfall for sprinkler irrigation or when the plant is under stress. A biodegradable surfactant may be used to optimize dispersal and leaf adherence Repeat application every 7 to 14 days as needed or vegetables spray several days before blooming. *It can be used for various crops which include Vegetables, Soybean Tur, Mung, grapes and other small fruits, Tree fruits, tree nuts, cotton, tobacco, shrubs shade and ornamental treesturf, foliage and flowering plants growing outdoors in greenhouses and interiors. VEDA SANJIVANI

Benefits of using Micro Mix

- Increases crop yields
- Increases root growth
- Increases chlorophyll content
- Increases nutrient uptake
- Enhances natural defence
- Improves soil structure
- Improves plant quality.
- Improves water retention

Content

Humic Acid	3.85%
Amino Acid	60%
Total Nitrogen	2.8%
Total Phosphoreus	0.85%
Total Potassium	5.15%
Calcium	1.12%
Magnesium	0.62%
Sulphate (PPM)	568
Manganese (mg/kg)	140
Silicon	50%
Iron (mg/kg)	28
Copper (mg/kg)	18
Zink (mg/kg)	115
Boron	28%
Carbon	20%

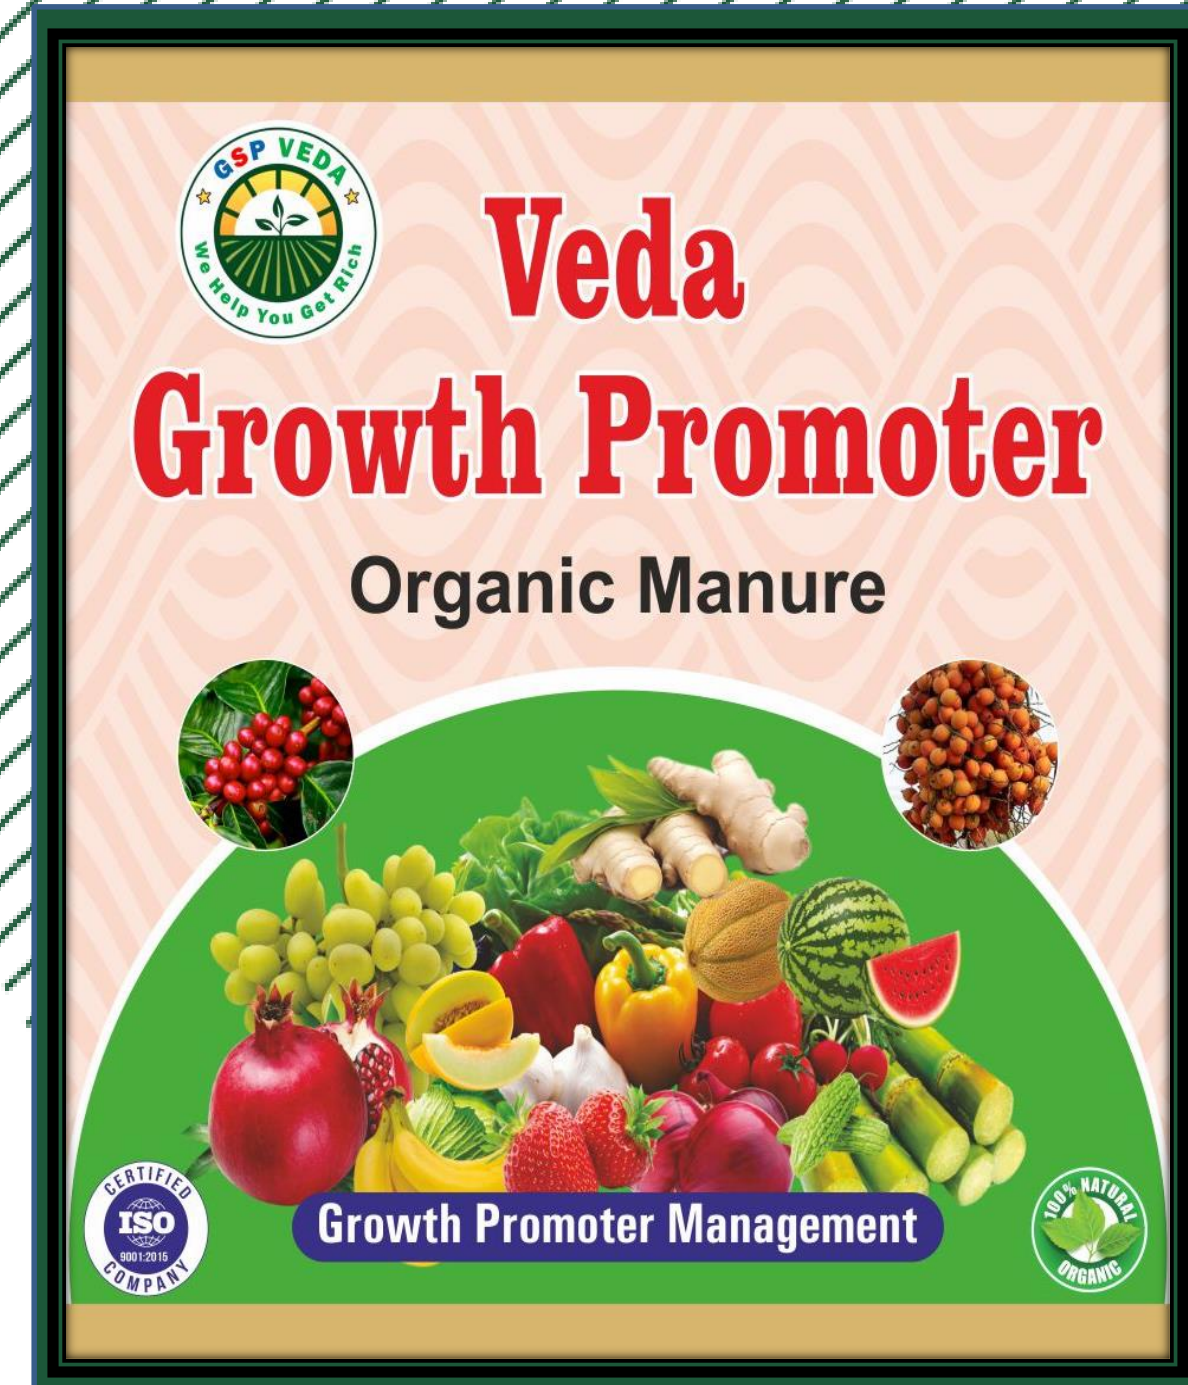

VEDA GROWTH PROMOTE

Veda Growth Promoter is 100% organic and eco friendly against environment Product.

It develops white roots which is useful for increasing in crop yield. It increase microbial activities in the soil, it supplies available nutrients to crops easily, It increases water holding capacity of soil. It increases aeration in the soil.

Contents :

Enzymes, Auxins, Seaweed Extract, Fulvic acid, Humic Acid, Amino Acid and micro nutrients
Concentrated liquid formulation blackish liquid with 100% organic origin. 100% water soluble formulation for higher uptake.

VEDA BLACK GOLD

Veda Black Gold is 100% organic and eco friendly against environment

Product.

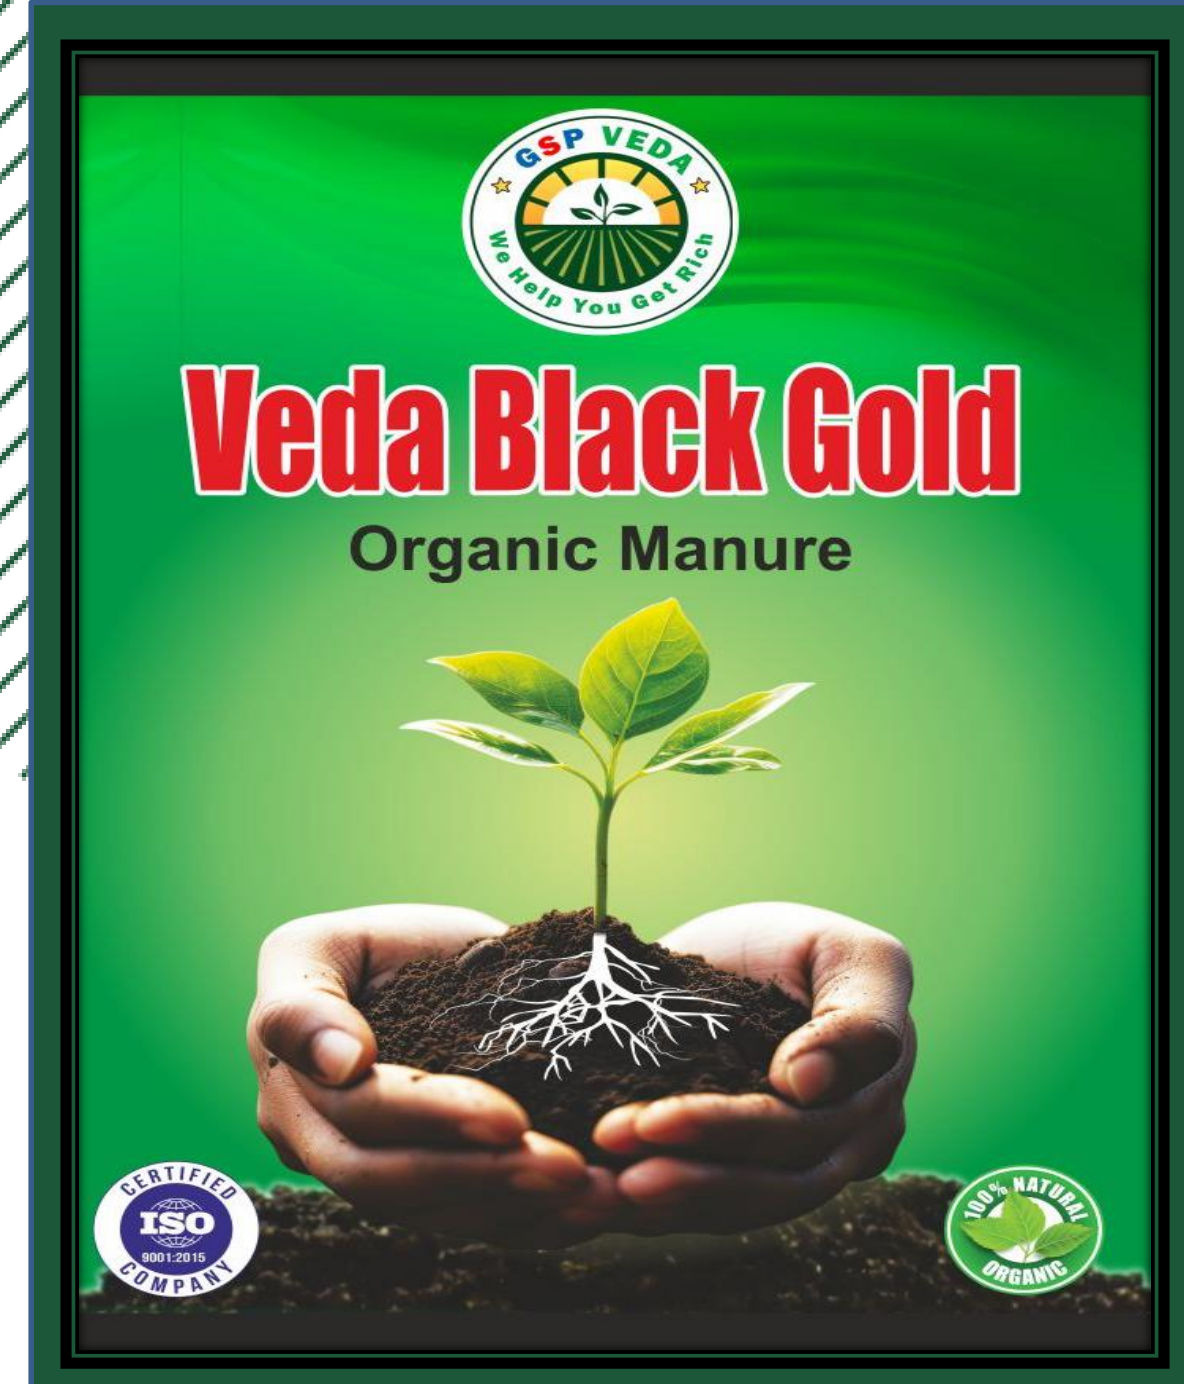

It develops white roots which is useful for increasing in crop yield. It increase microbial activities in the soil, it supplies available nutrients to crops easily, It increases water holding capacity of soil. It increases aeration in the soil.

Contents :

Enzymes, Auxins, Seaweed Extract, Fulvic acid, Humic Acid, Amino Acid and micro nutrients Concentrated liquid formulation blackish liquid with 100% organic origin. 100% water soluble formulation for higher uptake.

Storage :

Store out of sunlight in a cool, dry area stay away from children's, pets. Rinse container and discard after use in accordance with local state and federal regulation,
